AND Feel Good About Doing the Right Thing *Naturally*

Commercial Green-Waste Recycling *for Nevada and California*

We're more than the region's most involved, established and dedicated commercial composter; we're Full Circle, a family company.

Recycling more than 25,000 cubic yards (about 800 filled semi-trucks) of organic materials a year, Full Circle is doing big things. We're consistently looking to partner with businesses that are serious about reducing the amount of waste they send to the landfill. We know what to do with leftovers—including everything from food waste generated by restaurants and retailers to plant clippings from landscapers

OUR SERVICES INCLUDE:

- ✓ Green-Waste Consulting
- ✓ Organic Materials, Food-Waste, Plant Debris Recycling*
- ✓ Landfill Diversion
- ✓ Annual Events to Get Your Employees Involved in the Story

to manure from Nevada wild horses. We not only ensure this *green* waste avoids the landfill, we also recycle it into high quality composts and soils. These all-natural growing products are then used to improve the health, beauty and water retention of environments all throughout the region.

The 360-degree, comprehensive, sustainable cycle is what gives the company its name. It's our Full Circle philosophy that allows us to partner with businesses and organizations to reduce waste, improve efficiency and create a real story that *feels good*.

NOTABLE PARTNERS

(All of our partners notable, but here's a short list)

University of Nevada, Reno

Costco

Wal-Mart

South Tahoe Refuse

Northern Nevada Correctional Facility

Waste Management

Northern Nevada Landscape Companies

Check this out

Pine-needle green-waste from the Lake Tahoe Basin is composted into a proprietary replacement for peat moss (which is a dwindling resource).

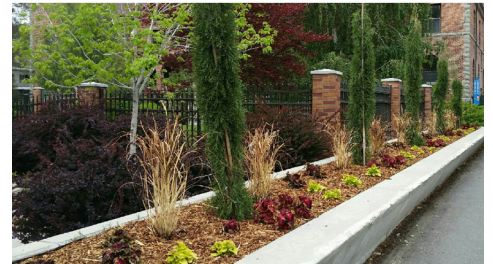

*Commercial loads only. Personal green-waste drop-off currently not available.

NOW WHAT TO DO WITH ALL THE BEAUTIFUL COMPOST? Think BIG with us.

After we've recycled literally tons of organic "waste," we create some of the most powerful, all-natural soils and composts on the planet. Personal gardeners, commercial growers and landscapers all use our products to complete the cycle and grow happy, healthy plants again and again. For BIG growers — whether on a farm, ranch, greenhouse, city project, landscape or other commercial growing operation, Full Circle Soils & Compost provides the all-natural products to help naturally improve yield, quality, drought resistance and even nutritional value.

- ✓ Local farmers and gardeners use Full Circle products to help eliminate the need for chemical fertilizers and pesticides.
- ✓ Full Circle has taught effective, large-scale composting practices to major commercial growers in the U.S. and Mexico.
- ✓ The University of Nevada, Reno ships lawn clippings, fallen leaves and more to Full Circle, then uses our composted products to grow beautifully lush landscapes.

Results Using Full Circle Compost's Organic Turf Fertility Package for the Annual Quad Reseeding

**Soil Analysis:
Day 1**

**Custom Compost
Applied: Day 3**

**Germination Begins:
Day 10**

**One Month Results:
Day 35**

Did you know?

- ✓ We recycle a variety of landscape green waste, including grass clippings, sod, branches, fallen leaves and woody biomass.
- ✓ Pre and post consumer food waste is transformed into a rich soil amendment that conserves water and is packed with nutrients plants love.

Let's get started!
